

FUTURE OF ULTRASHORT PULSES 2

16th – 17th of September | Hotel Zamek Stirin, Kamenice, Czech

Scientific Organizers

// Dr. Hanieh Fattahi
// Prof. Dr. Ferenc Krausz

Invited Speakers

// Prof. Nader Engheta
// Dr. Lukas Gallmann
// Prof. Georg Korn
// Prof. Alfred Leitenstorfer
// Dr. Christian Ott
// Dr. Günter Steinmeyer
// Prof. Laszlo Veisz

Scope of the workshop

The goal of this series of workshops is to bring together the leaders and young researchers in the ultrafast and attosecond communities to share our progress and goals towards the next generation of sources and their application to fundamental science

The main topics of the workshop are

// OPCA and enabling technologies for the next generation of femtosecond science
// Generation and control of lightwave transients
// Applications of lightwave transients to condensed matter physics and beyond
